### **EXAMINER'S COMMENT**

1. The Drawings of 22 July 2003 as corrected by the drawings of 17 February 2007 are hereby accepted as **FORMAL**.

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance:

None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicants' claimed method as set forth in independent claim 1 that is particularly characterized at least by the claimed method steps of "combining the first and second representations to form a three-dimensional model of the weather event" (lines 8-9); "constructing a three-dimensional shape of the three-dimensional model" (line 10); and "displaying the three-dimensional shape on a display" (line 11) taken together and taken in the overall context of independent claim 1.

Dependent claims 2-6 are allowable for at least the reasons for which independent claim 1 is allowable.

None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicants' claimed method as set forth in independent claim 7 that is particularly characterized at least by the claimed method steps of "performing a first airborne radar scan across a first plane ... horizontal" (lines 3-4); "generating a first shape descriptor that represents the weather event along the first plane" (lines 7-8); "performing a second airborne radar scan across a second plane, where the first and second

planes are substantially non-coplanar" (lines 10-11); "generating a second shape descriptor that represents the weather event along the second plane" (lines 14-15); "combining the first shape descriptor and the second shape descriptor to form a three-dimensional model of the weather event" (lines 16-17); and "constructing a three-dimensional shape from the three-dimensional model, wherein the three-dimensional shape is configured for display on an airborne display" (lines 18-19) taken together and taken in the overall context of independent claim 7.

Dependent claims 8-18 are allowable for at least the reasons for which independent claim 7 is allowable.

None of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicants' claimed apparatus as set forth in independent claim 19 that is particularly characterized at least by the claimed "airborne horizontal scanning radar apparatus ..."; "airborne vertical scanning radar apparatus ..."; and the "processor that determines a weather event based upon reflectivity readings ..." with all of the respective limitations of each as recited on lines 4-15 of claim 19 taken together and taken in the overall context of independent claim 19.

Dependent claim 20 is allowable for at least the reasons for which independent claim 19 is allowable.
